Abstract

Eichler, Hansjoerg. New combinations in *Tribulopsis* (Zygophyllaceae) of the Western Australian flora. *Nuytsia* 5(1): 177 (1984). Transfers are made from *Tribulus* to *Tribulopsis* for two species and one variety which is simultaneously raised to the rank of species.

The checking of entries for Zygophyllaceae in the "Census of vascular plants of Western Australia" by J. W. Green (Feb. 1981) in assisting the preparation of a revised edition revealed the need for three new combinations which are here validated as follows:

Tribulopsis affinis (W. Fitzg.) H. Eichler, comb. nov. *Tribulus affinis* W. V. Fitzgerald, J. Roy. Soc. W. Austral. 3: 157 (8 Oct.-10 Dec. 1918) [Repr.: 56 (Nov 1918)].

Tribulopsis curvicarpa (W. Fitzg.) H. Eichler, comb. nov. *Tribulus curvicarpus* W. V. Fitzgerald, J. Roy. Soc. W. Austral. 3: 158 (8 Oct.-10 Dec. 1918) [Repr.: 57 (Nov 1918)].

Tribulopsis sessilis (Domin) H. Eichler, stat. et comb. nov. *Tribulus solandri* var. *sessilis* Domin, Biblioth. Bot. 89: 281, 835 (Oct. 1926).

Publication date of *Nuytsia* Volume 4 Number 3: 11 October 1983
